## The Bowl from a Cube

Theo will show us how to turn a bowl from a cube for our final Live Session in 2020.

There will be plenty of instructions, guidance and woodturning wisdom delivered during this project, which will result in what appears to be a relatively advanced turning project.

We will learn various ways of mounting the cube, and how to make a 3 sided jig to turn, sand and finish the base of the bowl.

Finally, and in answer to Andrew Halls' Musical finale last week, Theo might be persuaded to break out a tune of his own!

This week, Theo covers:

- Understanding the unusual grain direction in this project.
- Strategies for mounting the cube.
- Evading a catch when turning in air.
- How to avoid those sharp points when turning.
- Focus on the feet.
- Making a special jig.
- Sanding in safety.

### Meet Theo Haralampou

I initially took up woodturning 23 years ago so I could turn my own drumsticks and make gifts for my family and friends.

These days demonstrating and teaching woodturning is my greatest passion and full-time endeavour. Apart from demonstrating throughout Australia

and New Zealand at symposiums, club events and wood shows, I have also demonstrated in the USA AAW Symposium, on the Woodturning Cruise through the fjords of Norway and for World Wood Day celebrations and tours in China, Cambodia and Laos.

I enjoy demonstrating the safest and easiest way to sharpen tools, develop good tool control, and take advantage of the characteristics of the wood to turn and embellish interesting, diverse and artful projects. I feel extremely privileged to be able to share my knowledge and experience with others.

My philosophy is that life is too short, so we should enjoy the journey, share with others and leave something to show we were here.

**Interact live with internationally acclaimed woodturner Theo Haralampou who will be demonstrating from his studio workshop in Brisbane Australia.**
